

# Health in All Policies (HiAP)

What, Why and How

Lisa B. Hernandez, MD MPH  
March 11, 2015

# What is Health in All Policies (HiAP)?

---

- ▶ It is a systematic approach to improving health on the community-level by considering health in decisions that shape the environments where people live, learn, work, play, and travel.
- ▶ It is a collaborative approach that integrates and articulates health considerations into policy making across sectors, and at all levels, to improve the health of all communities and people.

# NACCHO HiAP Policy Statement

---

- ▶ **Federal, State, Local, Government role:**
  - ▶ Adopt a Health in All Policies approach in the policy-making process in order to ensure that policies made outside of the health sector have positive or neutral impact on the determinants of health
  - ▶ Provide funding, training, and technical assistance for local health departments (LHDs) to ensure that they can assume a leadership role implementing a HiAP approach at the local level and determine the best strategies for implementing HiAP locally.
- ▶ **Local health departments should:**
  - ▶ Take a leadership role to implement HiAP at the local level, including identifying the best strategies for implementing HiAP in the LHD jurisdiction
  - ▶ Assume a prominent role educating local, state, and federal policymakers about the value of HiAP

# Why HiAP?

---

- ▶ Need to address health comprehensively because many of the factors that impact health are driven by multiple factors outside public health or healthcare
- ▶ Health Services Agency receives grant from NACCHO
- ▶ Grant
  - ▶ Focus on South County
  - ▶ Move from regional concentration and broaden efforts

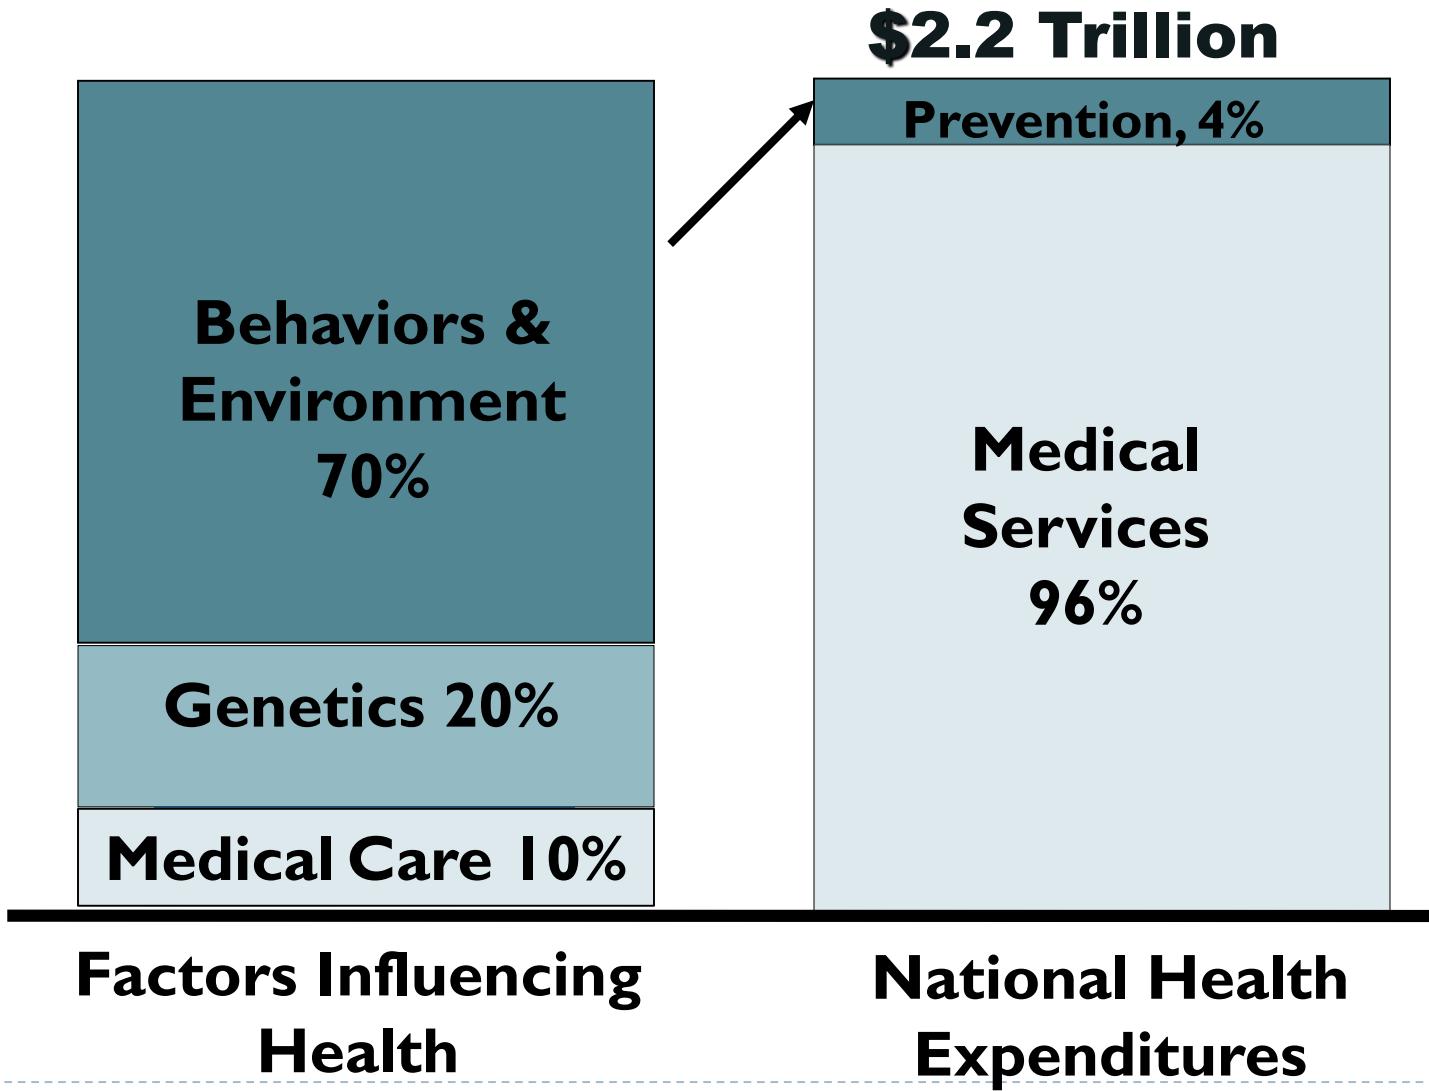

# What is health?

---

*Health is the state of complete physical, mental, and social well-being and not merely the absence of disease or infirmity.*

- World Health Organization

# How is our health influenced?

# How does our environment impact our health?

---

**Social Capital**

**Air Quality**

**Physical Activity Levels**

**Access to Healthy Foods**

**Water Quality**

**Traffic-Related Accidents**

**Exposure to Toxins & Chemicals**

**Social Equity**

**Climate Change / Extreme Weather**

# Equality vs. Equity

The diagram consists of two side-by-side panels. Both panels show a group of children standing on wooden boxes at a baseball game, with their arms raised in excitement. In the left panel, labeled "equality", the boxes are of equal height, representing sameness. In the right panel, labeled "equity", the boxes are of different heights, representing fairness. Below each panel is a title and a descriptive text.

**Equality = SAMENESS**

Equality is about SAMENESS, it promotes fairness and justice by giving everyone the same thing.

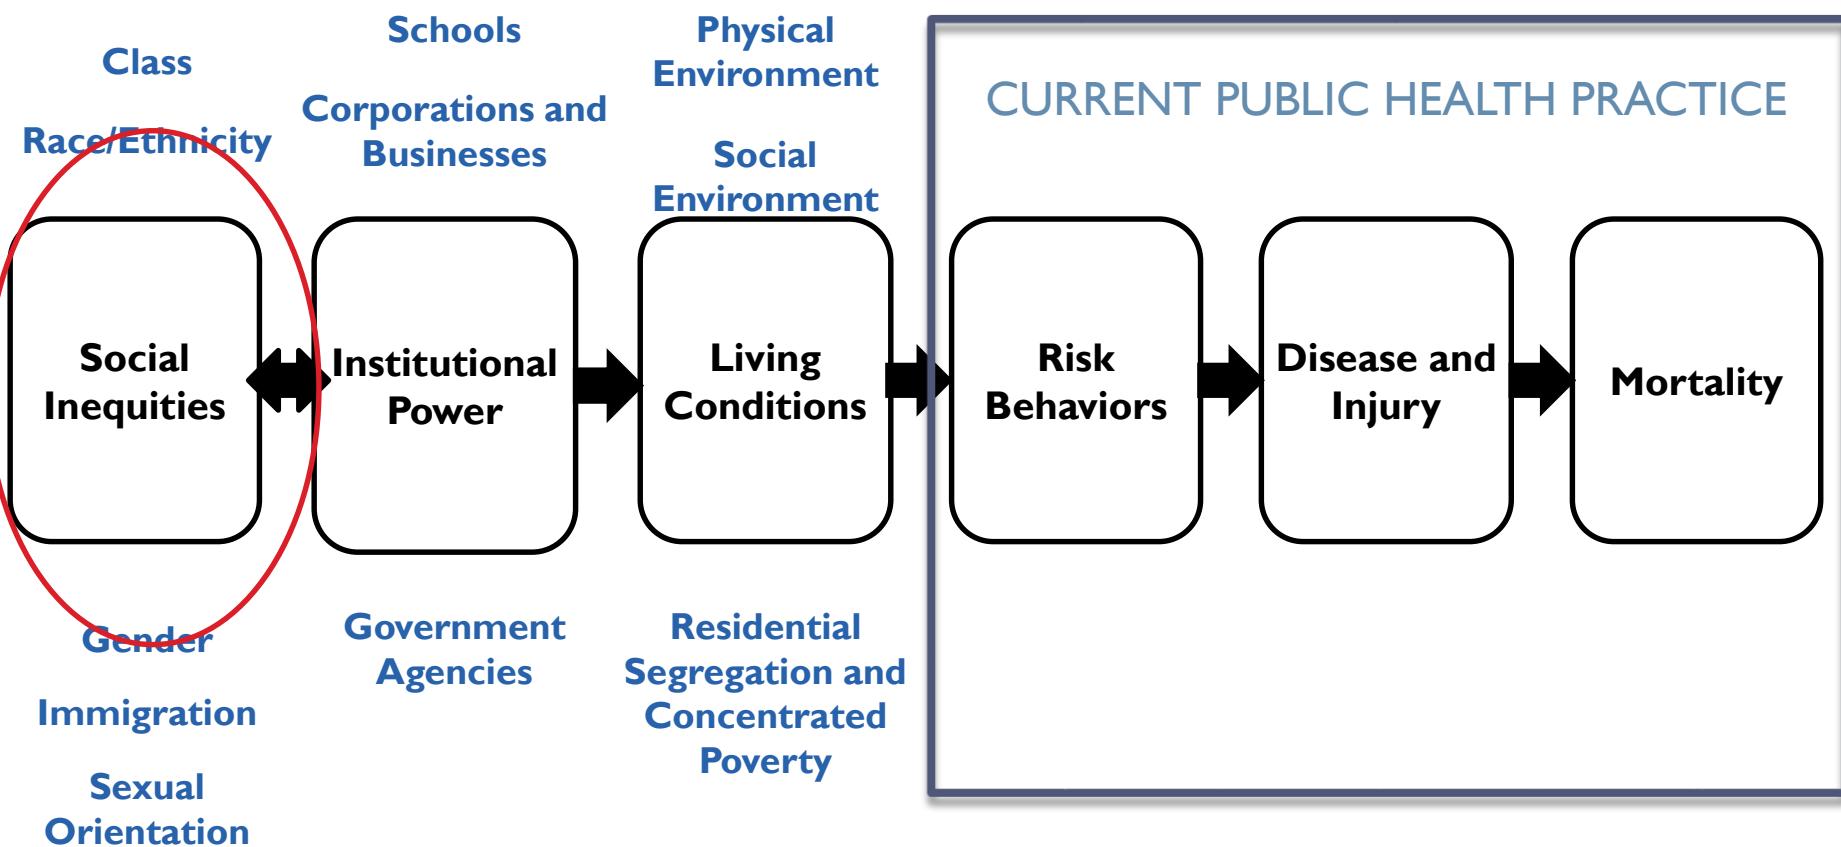

BUT it can **only work IF everyone starts from the SAME place**, in this example equality only works if everyone is the same height.

**Equity = FAIRNESS**

EQUITY is about FAIRNESS, it's about making sure people get access to the same opportunities.

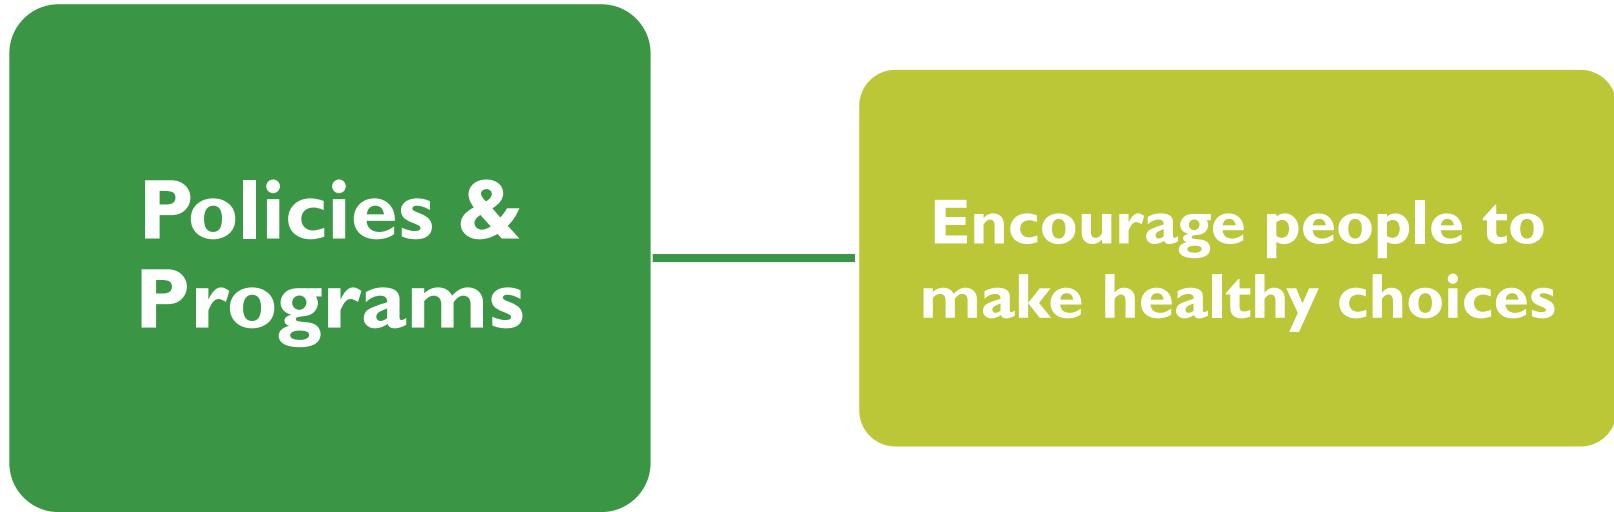

Sometimes our differences and/or history, can create barriers to participation, so we must **FIRST ensure EQUITY before we can enjoy equality.**

# BARHII Framework for Reducing Health Inequities

# How can decisions impact our health?

---

# How can decisions impact our health: walking and biking?

---

## **Stakeholders**

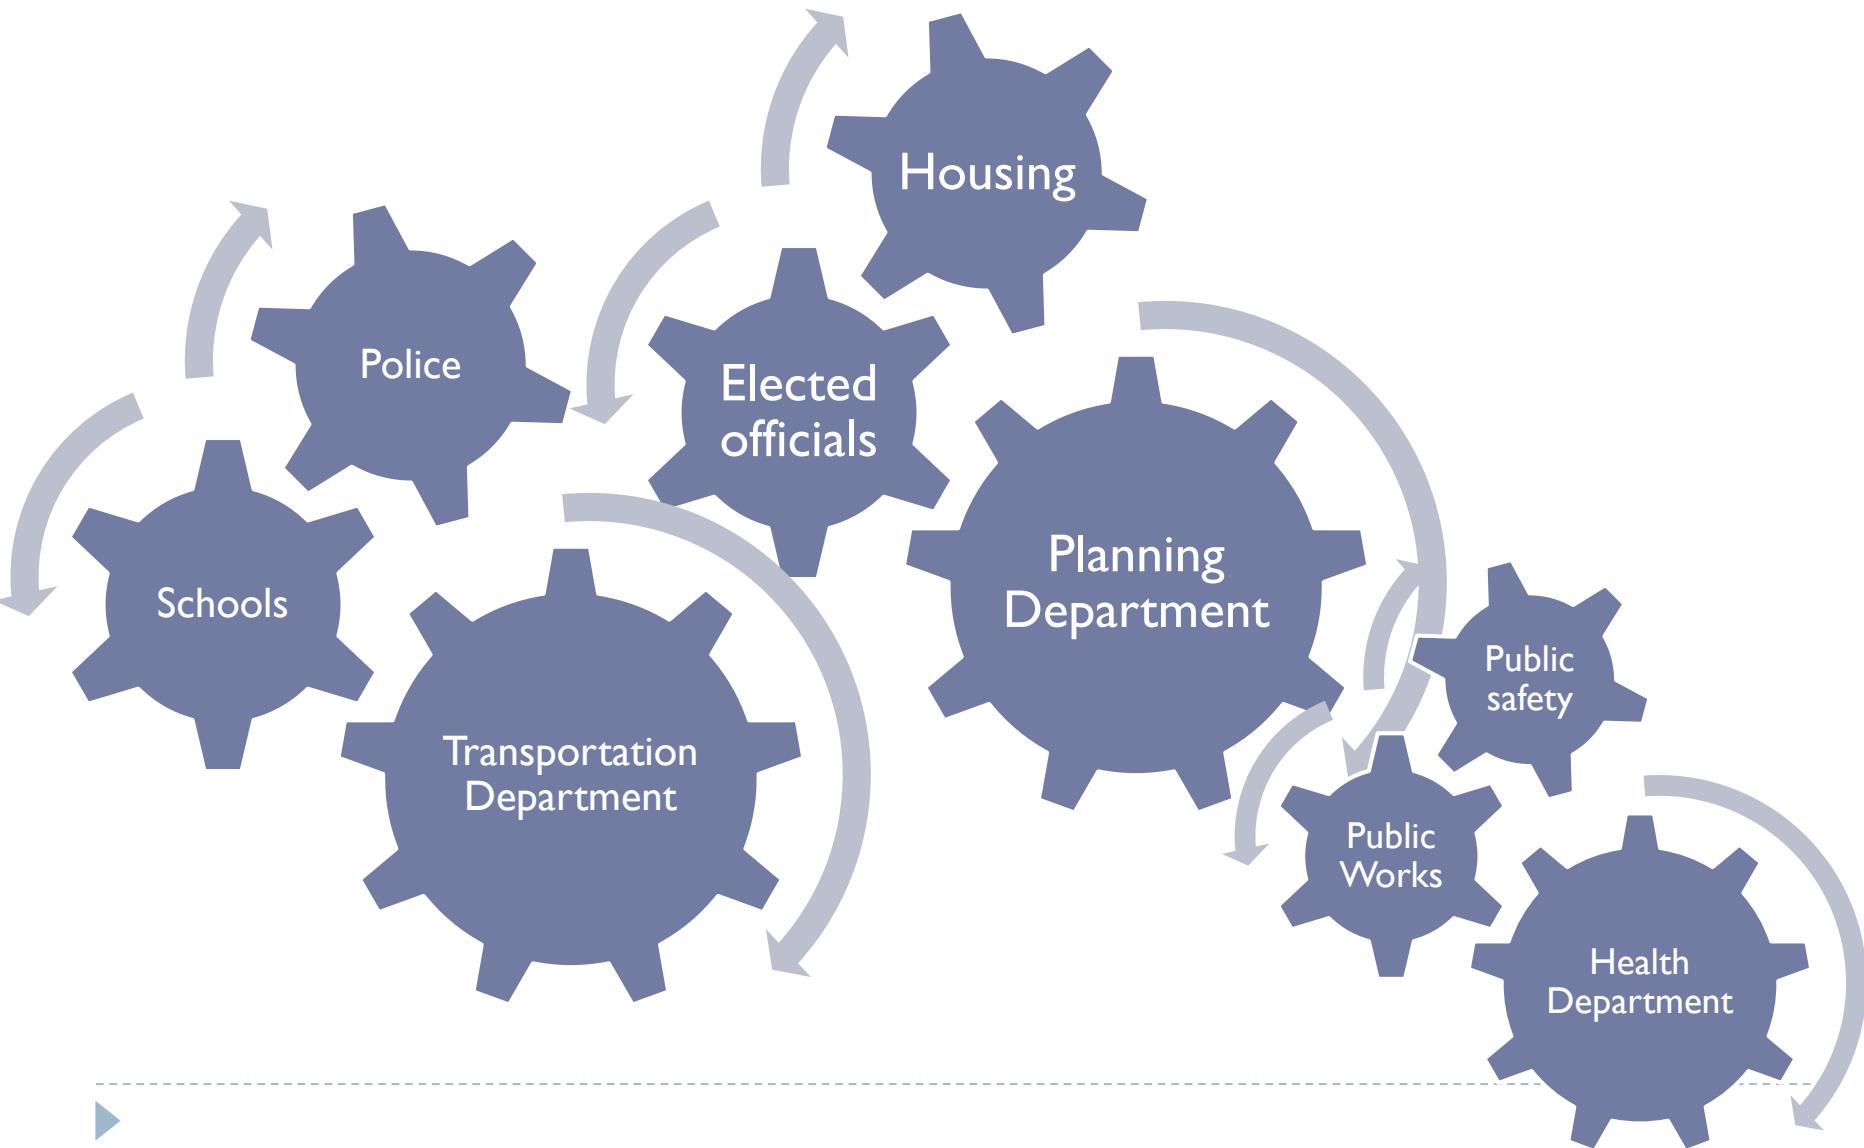

- ▶ **Elected Officials**
- ▶ **Transportation Department**
- ▶ **Planning Department**
- ▶ **Police Department**
- ▶ **Health Department**
- ▶ **Non-Profit Organizations**

## **Health Outcomes**

- ▶ **Physical Activity**
- ▶ **Air Quality**
- ▶ **Climate Change**
- ▶ **Social Capital**
- ▶ **Traffic-Related Injuries**

# How can decisions impact our health?

# The how-to of HiAP

---

- ▶ **Health considerations in the decision making process** → How does a prospective-decision potentially impact population health?
- ▶ HiAP is **upstream** – the focus is on addressing potential health impacts early in the decision processes
- ▶ HiAP is **comprehensive** – all sectors, all stages of policy processes, all levels of government

# Tactics for Implementing HiAP

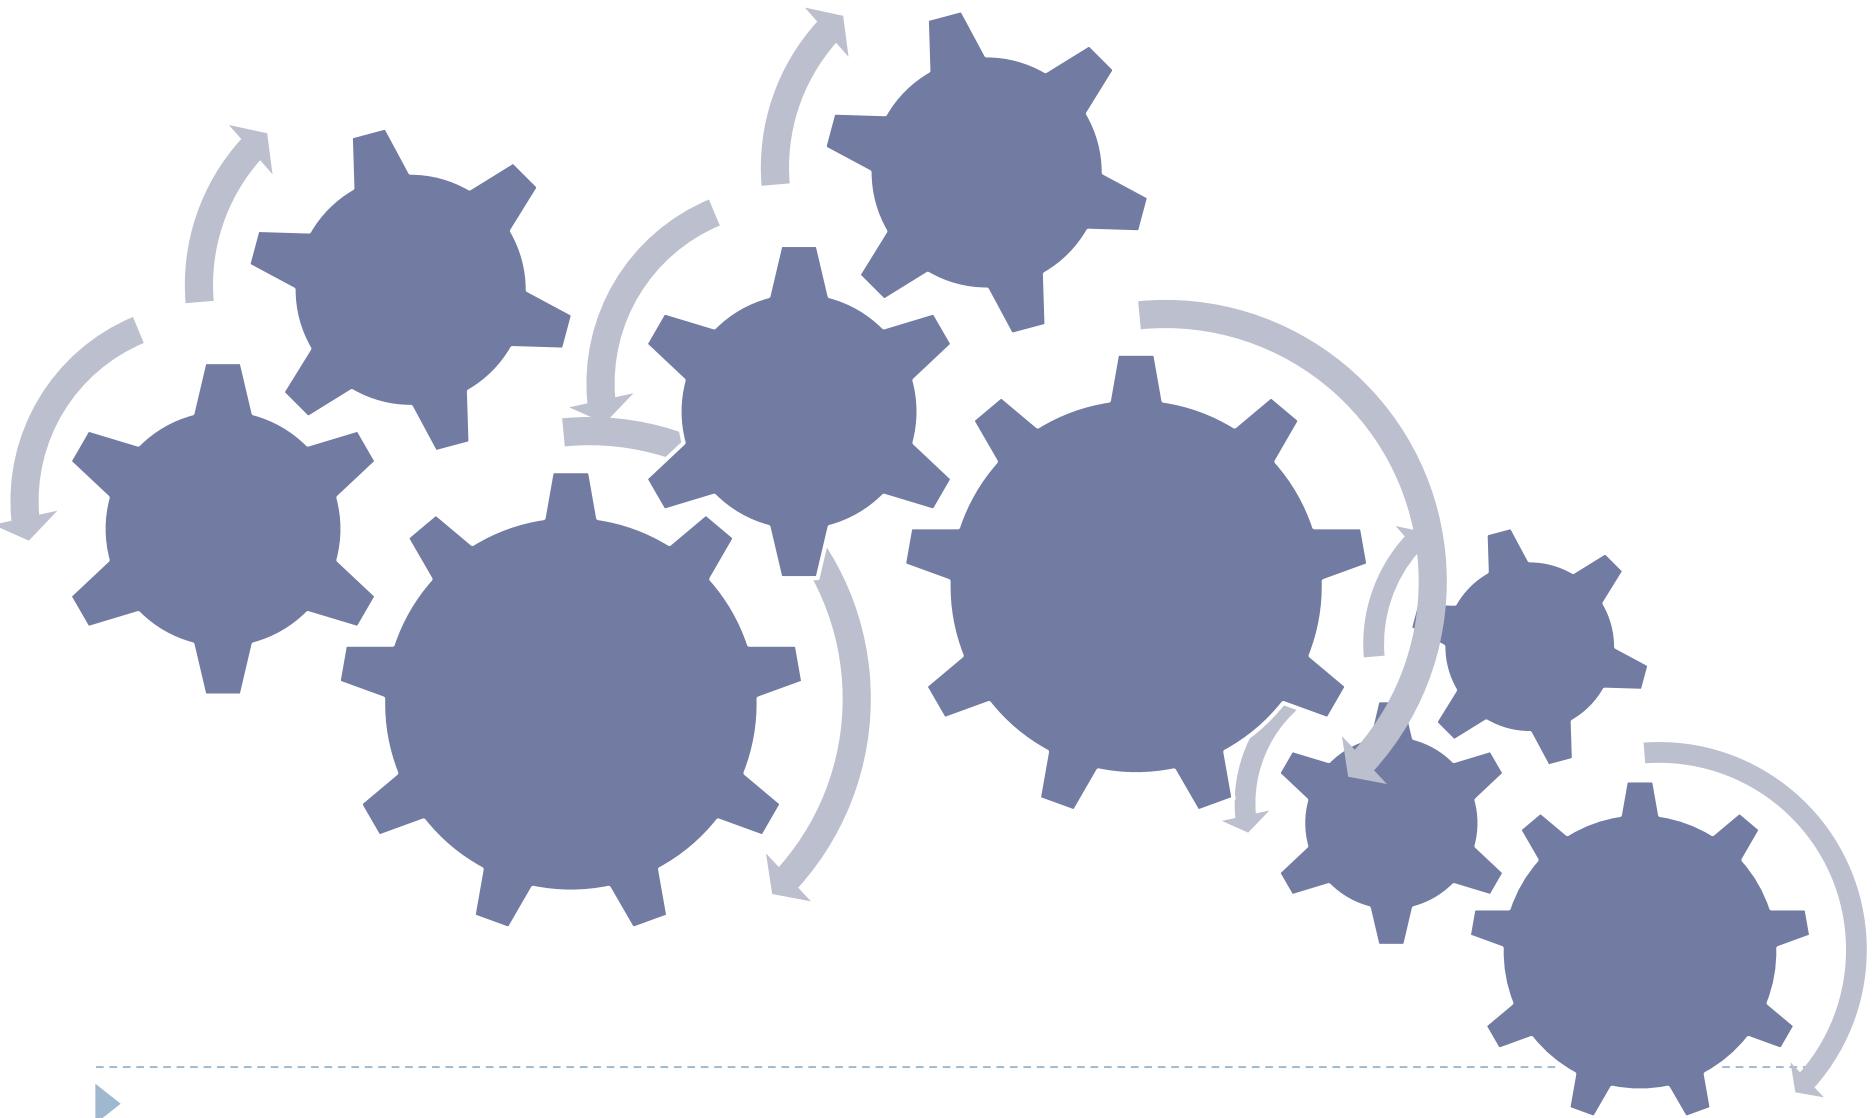

---

- ▶ **Convene a cross-sector collaborative or task force**
- ▶ **Consider health in the policy making process**
- ▶ **Establish accountability structures**

# How can HiAP help our community?

---

# Thank you

**Public Health**  
Prevent. Promote. Protect.
