1. Who would like to co-facilitate on 12/16/21?
2. Introductions: name, program

Project Status and Updates

1. **NEW REQUEST: Remove the “Referred to MD...” question from the Psychosocial Assessment** STAFF: Dave/Joanna Moody TIME ALLOTTED: 15 mins

Client has been referred to MD for medication evaluation and/or to rule out physical health factors, which may impact client's functioning

Yes

No

Describe result, and any pertinent information about treatment

- a. The reason for the change request is that recent audit of a chart where the question had been answered “No,” led to denials.
- b. Cybele Lolley adds that as long as we can explain what the no means, this should pass audit. Currently, the question is disabled/greyed out when the answer is “No.” Gian will change the form so this does not happen and people can document why when they click “No.”
- c. Discussion about helping clinicians understand how to answer this question correctly.
- d. Answers (Y/N) mean the following:

12/2/2021

9:00 AM - 10:00 AM

- i. No - The client has not seen their doctor to discuss the presenting problem and we are making a referral, or
- ii. Yes - Client/guardian states that presenting problem has been already discussed with their doctor.
- e. Proposed Change: Remove "yes-no" button from the question and Replace with two questions because the question is really getting at two things:
 - i. Whether or not the client/Guardian has reported medical issues, and...
 - ii. Whether or not the client has been referred to physical healthcare to rule out the possibility that the behavioral health issue can be treated through primary care.
- f. Below is extracted data from the psychosocial about responses to this question, from 7/1/19 to the present.

PSA: MD Referral Item	No	Yes	Total	% Yes
Adult Mental Health	1348	952	2300	41%
Children's Mental Health	362	1872	2234	84%
Grand Total	1710	2824	4534	62%

- a. BACKGROUND: The report was developed for all providers to have a compliance report; supervisors have the program-level report. With the new report, line staff can print it any time they want. They don't have to wait for their supervisor to do it.
- b. FEEDBACK from line staff below:
 - i. Name on printed report is "MH Supervisor Compliance Report"—
 - ii. Unanimous: EP column not needed
 - iii. Same for Program column—not needed
 - iv. Same for Staff Name—'I am running my report for me, I don't need my name listed'
 - v. Admit date column—not needed.

3. NEW ITEM: Sara: Onset of Services
 - a. Discussion of whether or not to continue using this form.
 - b. CONS:
 - i. Duplicative - Those who use it also have clients sign paper forms. The original intent of the Onset of Services was to generate overpour after client signed everything electronically, that could then be offered to the client, but we do not have the software available to print a report in this manner.
 - ii. Due to a "known problem" by NetSmart, it is very difficult and time-consuming to "swap" links to forms when forms are updated. Therefore, many of the links point to outdated and incorrect forms.
 - iii. Because the form is not episodic, anyone can see it in the chart. Therefore, for clients with sequestered SUD episodes, the form cannot be used.
 - iv. The form is used inconsistently across programs due to its problems.
 - c. PROS
 - i. The form does provide easily accessed documentation to verify whether or not certain forms have been signed/completed/offered to clients such as HIPAA forms and consent for treatment.
 - ii. The form provides a reminder to clinicians about certain forms they must complete.

d. RECOMMENDATION FROM COMMITTEE IS TO STOP USING THE ONSET OF SERVICES AND DOCUMENT THAT INTAKE FORMS HAVE BEEN DONE ELSEWHERE (PROGRESS NOTE).

- i. Staff need to be retrained/reminded that they should document in the client chart, typically in a progress note, that releases, HIPAA forms, consents, etc. have been signed by the client, and copies offered to the client.
 - ii. Other discussion/recommendations
 1. Recommendation from Committee with input from Cybele Lolley, County QI Director:
 2. For now, because the form is not really user or beneficiary appropriate, we will stop use of this form.
 3. Supervisors and managers on this committee should distribute meeting minutes to inform their staff of changes.
 4. Although the form is well intended, and would be a great asset if it worked properly, currently it does not.
 5. We should look to the future, possibly Avatar NX for creation of a form like this that actually works.
4. Table for next meeting - we were not able to get to these items.
 - a. Client Alerts Cleanup
 - b. Request for a system, likely an assessment, to track Key Indicators for Children's Intensive Support Services. STAFF: Stan Einhorn
 - c. NOABD Termination and Closing Inactive Episodes STAFF: Dave
